CASE STUDY

F-LON® 6000

NON-STICK COATING IN THE AUTOMOTIVE
INDUSTRY

AT A GLANCE 

Industry: Automotive
Product: Rubber mould

F-LON® 6000 is a patented coating applied in a single coat with excellent Non-Stick properties.

THE CHALLENGE

The client requested a coating suitable for releasing rubber components from injection moulding tools to ensure easy clean releasing of the components to avoid messy spray release products being used which slows down production and adds to the clean down costs.

THE SOLUTION

We provided F-LON® 6000 non-stick release coating to all working areas of the mould faces eliminating the need to apply silicone spray.

Ensuring uninterrupted production runs and reducing costs.

BENEFITS

Benefit One

The need for silicone spray eliminated.

Benefit Two

Uninterrupted production runs and reduced costs.
