

FLUOROCARBON

Fluorocarbon Expertise Medical Industry

Fluorocarbon have been a proven supplier for many years, contributing to advanced healthcare solutions, providing R & D support, offering innovative material solutions and recommendations for critical applications.

We successfully provide a range of fluoropolymer materials including PCTFE, PTFE, ETFE, PFA and PEEK. These are just a few of the materials currently being used in mass spectrometry, testing and diagnostic equipment, Anaesthetic equipment, oxygen therapy and ventilators.

We manufacture Seals, Thrust Bearings, PTFE Face Seals, Washers and much more; we can offer both standard and bespoke designs using our large array of materials.

Our machining facilities are able to offer precision milled and turned components from our fluoropolymer range, and our experience allows us to offer complex, tight tolerance, machined parts.
