Fluorocarbon Group incorporating: Fluorocarbon Limited, Fluorocarbon Surface Technologies Ltd & Fluorocarbon Polymers SRL

Policy name: General Data Protection Policy (GDPR) Data protection Policy

Date produced: 12 04 2018

Classification: EXTERNAL

Data Protection Policy

Introduction

At Fluorocarbon, we collect and process information about individuals (i.e. 'personal data') for business purposes, provision of our services, marketing, and business administration. This includes personal data relating to our, customers, suppliers and other third parties.

Compliance with data protection law is essential to ensure that personal data remains safe, our business operations are secure and the rights of individuals are respected. Fluorocarbon is a controller under data protection law, meaning it decides how and why it uses personal data. This Policy explains our procedures for complying with data protection law in relation to personal data. It also sets out our obligations whenever we are processing any personal data in the course of our employment.

If our staff routinely handles individuals' personal data, they will be given specific training regarding data protection procedures in relation to their particular role. This training will supplement our obligations as set out in this Policy.

There will also be other policies which will impact on how we deal with personal data and data protection. The main one is our Electronic Communications Policy, and we expect all of our employees to comply with this where relevant.

This Policy may be updated at any time.

Who does this Policy apply to?

This Policy applies to all Fluorocarbon employees, workers, contractors, agency workers, consultants, apprentices, volunteers, partners and directors and customers or suppliers. (together referred to as 'We' or 'you').

Who is responsible for data protection at Fluorocarbon?

The Board is ultimately responsible for Fluorocarbon's compliance with applicable data protection law. Fluorocarbon has appointed Data Protection Champion(s) who are responsible for overseeing advising Fluorocarbon on and administering compliance with this Policy and data protection law. Department Heads will be responsible for ensuring full compliance of this Policy and data protection law by all staff in their department/team.

All Employees at Fluorocarbon have some responsibility for ensuring that personal data is kept secure and processed in a lawful manner although certain Employees will have particular responsibilities, of which they will be aware and in respect of which they may receive specific instructions.

If you are in any doubt about how you should handle personal data, or if you have any concerns or questions in relation to the operation (or suspected breaches) of this Policy, you should seek advice from the Data Protection Champion(s) by emailing DPchampions@fluorocarbon.co.uk

Fluorocarbon Group incorporating: Fluorocarbon Limited, Fluorocarbon Surface Technologies Ltd & Fluorocarbon Polymers SRL

Policy name: General Data Protection Policy (GDPR) Data Protection Policy

Classification: EXTERNAL

Why is data protection compliance important?

Data protection law in the UK is regulated and enforced by the Information Commissioner's Office (ICO). Failure to comply with data protection law may expose Fluorocarbon and, in some cases, individual Employees to serious legal liabilities. These can include criminal offences and fines of up to EUR20 million (approximately £18 million) or 4% of total worldwide annual turnover, whichever is higher. In addition, an individual may seek damages from us in the courts if we breach their rights under data protection law. Breaches of data protection law can also lead to serious damage to our brand and reputation.

What is personal data?

Personal data means any information relating to any living individual (also known as a 'data subject') who can be identified (directly or indirectly) in particular by reference to an identifier (e.g. name, NI number, employee number, email address, physical features). Relevant individuals can include your colleagues, consumers, members of the public, business contacts, etc. Personal data can be factual (e.g. contact details or date of birth), an opinion about a person's actions or behaviour, or information that may otherwise impact on that individual. It can be personal or business related.

Personal data may be automated (e.g. electronic records such as computer files or in emails) or in manual records which are part of a filing system or are intended to form part of a filing system (e.g. structured paper files and archives).

What does 'processing' personal data mean?

'Processing' personal data means any activity that involves the use of personal data (e.g. obtaining, recording or holding the data, amending, retrieving, using, disclosing, sharing, erasing or destroying). It also includes sending or transferring personal data to third parties.

Data Protection Obligations

Fluorocarbon is responsible for and must be able to demonstrate compliance with data protection law. To ensure that Fluorocarbon meets its responsibilities, it is essential that its Employees comply with data protection law and any other Fluorocarbon policies, guidelines or instructions relating to personal data when processing personal data in the course of their employment.

We have set out below the key obligations under data protection law and details of how Fluorocarbon expects Employees to comply with these requirements.

1. Process personal data in a fair, lawful and transparent manner

Legal grounds for processing

Data protection law allows us to process personal data only where there are fair and legal grounds which justify using the information.

Examples of legal grounds for processing personal data include the following (at least one of these must be satisfied for each processing activity):

- complying with a legal obligation (e.g. health and safety or tax laws);
- entering into or performing a contract with the individual (e.g. an Employee's terms and conditions of employment, or a contract for services with an individual customer);
- acting in Fluorocarbon or a third party's legitimate interests (e.g. maintaining records of business activities, monitoring business productivity); and
- obtaining the consent of the individual (e.g. for sending direct marketing communications).

Where consent is relied upon, it must be freely given, specific, informed and unambiguous, and Fluorocarbon must effectively demonstrate that consent has been given.

In most cases, consent is also not required for other standard business activities involving use of customer or supplier data, but it may be needed for activities which are not required to manage the main business relationship, such as direct marketing activities.

Transparency

Data protection law also requires us to process personal data in a transparent manner by providing individuals with appropriate, clear and concise information about how we process their personal data.

We usually provide individuals with basic information about how we use their data on forms which collect data (such as application forms or website forms), and in longer privacy notices setting out details including: the types of personal data that we hold about them, how we use it, our legal grounds for processing the information, who we might share it with and how long we keep it for. For example, we provide information about our processing of Employees' personal data in the Fluorocarbon Employee Privacy Notice.

We supplement these notices, where appropriate, with reminders or additional information at the time particular processing activities take place or become relevant for an individual (for example when they sign up for a new service or event).

What we need to do:

By processing personal data only in accordance with our lawful job duties and Fluorocarbon instructions, ordinarily, we will be processing personal data fairly and lawfully.

The standard privacy notices and statements that we issue, for example, to Employees, customers and the public, should normally be sufficient to ensure that individuals have appropriate information about how you are handling their personal data in the course of your employment. However, you should consider whether reminders or additional information may be appropriate at the time particular processing activities take place. This is particularly important if you think that individuals may need further assistance to understand clearly how their data will be used as part of such activities.

Any new forms which collect personal data and any proposed consent wording must be approved in advance by the Data Protection Champion(s).

If we have any concerns about the legal grounds for processing personal data or if we are unsure whether individuals have been provided with appropriate information (in particular in relation to any new processing activities), we will check with the Data Protection Champion(s).

2. Take extra care when handling sensitive or special categories of personal data

Some categories of personal data are 'special' because they are particularly sensitive. These include information that reveals details of an individual's:

- racial or ethnic origin;
- political opinions;
- religious or philosophical beliefs;
- trade union membership;
- physical or mental health;
- sexual life or sexual orientation;
- biometric or genetic data (if used to identify that individual); and
- criminal offences or convictions.

Where special category personal data is concerned, data protection law requires us to have (as well as one of the legal grounds described in section 1), an additional legal ground to justify using this sensitive information. The appropriate legal ground will depend on the circumstances.

Additional legal grounds for processing special category data include the following. Those marked with an asterisk (*) would be particularly relevant to processing Employees' special category personal data:

- complying with a legal obligation/exercising a legal right in the field of employment*;
- assessing working capacity (based on expert medical opinion, and subject to obligations of confidentiality)*;
- carrying out equalities monitoring in relation to racial or ethnic origin, religious beliefs, health or sexual orientation*;
- exercising, establishing or defending legal claims*;
- preventing or detecting unlawful acts; or
- explicit consent of the individual. (As well as the requirements for consent outlined in section 1 above, this requires an express statement from the individual that their special category of data may be used for the intended purposes.)

What we need to do:

If we are handling special category personal data in the course of our employment, we take extra care regarding compliance with data protection law. In particular, try to ensure that:

- any processing activities are strictly in accordance with our lawful job duties and Fluorocarbon instructions;

Fluorocarbon Group incorporating: Fluorocarbon Limited, Fluorocarbon Surface Technologies Ltd & Fluorocarbon Polymers SRL

Policy name: General Data Protection Policy (GDPR) Data Protection Policy

Date produced: 12 04 2018

Classification: EXTERNAL

- there are appropriate legal grounds for processing the data (both basic grounds under section 1 and additional grounds under this section 2) which have been assessed for your specific activities;
- individuals have received adequate information regarding how their data is being handled. In some cases an existing privacy notice may need to be supplemented with more specific information regarding special category data (e.g. when Fluorocarbon is managing sickness absence and/or making adjustments to job duties for Employees with disabilities or serious illness, we may provide additional ad hoc privacy notices to supplement the Employee Privacy Notice);
- we apply additional security and confidentiality measures, taking into account that the impact on individuals of loss or misuse of their special category data may be greater than with other types of data. See also section 7 below; and
- if we are relying on consent as a legal ground for processing, you obtain advance approval of any consent wording from the Data Protection Champion(s).

If our staff are routinely handling special category data as part of the requirements of their role and job duties, Fluorocarbon will ordinarily have put in place procedures which ensure that our processing activities satisfy the requirements above.

However, if alternative circumstances apply (e.g. we are involved in a new project or updating an existing system which involves new types of processing of special category data), we will contact the Data Protection Champion(s) to ensure that the correct compliance procedures are followed.

Similarly, if we have any concerns over the legal grounds that apply when we are processing special category data or the appropriate information to be provided to individuals, we will consult with the Data Protection Champion(s).

3. Only process personal data for specified, explicit and legitimate purposes

Fluorocarbon will only process personal data in accordance with our legitimate purposes to carry out our business operations and to administer employment and other business relationships.

What we need to do:

We must only use the personal data that we process in the course of our duties for Fluorocarbon legitimate and authorised purposes. We must not process personal data for any purposes which are unrelated to our job duties.

Processing personal data for any incompatible or unauthorised purposes could result in a breach of data protection law (e.g. using the company contacts database to find out a colleague's home address for private, non-work related purposes). This may have potentially damaging consequences for all parties concerned, including disciplinary action.

If we find that we need to process personal data for a different purpose from that for which it was originally collected, we must check whether the individuals have been informed and, if not, consider whether the additional purpose is legitimate (in the context of Fluorocarbon's business activities) and compatible with the original purpose.

If we are unsure about whether the purposes for processing are legitimate, we would contact the Data Protection Champion(s) before going ahead with processing the data for the additional purpose.

4. Make sure that personal data is adequate, relevant and limited to what is necessary for your legitimate purposes

Data protection law requires us to ensure that, when we process personal data, it is adequate, relevant to our purposes and limited to what is necessary for those purposes (also known as 'data minimisation'). In other words, we ask for the information we need for our legitimate business purposes, but we won't ask for more information than we need in order to carry out our business operations.

What we need to do:

We should try to ensure that we only acquire and process the personal data that we actually need for Fluorocarbon's legitimate and authorised purposes within the scope of our roles.

We must ensure that we have sufficient personal data needed to be able to use it fairly and to take into account all relevant details.

If we are creating forms that collect personal data, we should be able to justify why each specific category of data is being requested.

We must also comply with Fluorocarbon's instructions about data retention and storage, ensuring that personal data is only kept for as long as it is needed for any intended purpose.

5. Keep personal data accurate and (where necessary) up-to-date

Fluorocarbon must take steps to ensure that personal data is accurate and (where necessary) kept up-to-date. For example, we request that Employees provide us with any change in contact details or personal information by completing the 'Change of Personal Details' form and handing this to the HR Department.

What we need to do:

When we process individuals' personal data in the course of our employment, we must make reasonable efforts to be accurate and, where necessary, keep the relevant information updated.

When collecting any personal data, we try to confirm its accuracy at the outset. If we subsequently discover any inaccuracies in the personal data that we are handling, these need to be corrected or deleted without delay.

Personal data should be held in as few places as possible to avoid the risk that duplicate copies are not updated and become out of sync. We should not create additional copies of personal data, but should work from and update a single central copy where possible (in accordance with standard Fluorocarbon procedures on retention and storage of records).

6. Keep personal data for no longer than is necessary for the identified purposes

Fluorocarbon Group incorporating: Fluorocarbon Limited, Fluorocarbon Surface Technologies Ltd & Fluorocarbon Polymers SRL

Policy name: General Data Protection Policy (GDPR) Data Protection Policy

Date produced: 12 04 2018

Classification: EXTERNAL

Records containing personal data should only be kept for as long as they are needed for the identified purposes. Fluorocarbon has in place data retention, storage and deletion policies and internal processes/guidelines regarding various types of company records and information that contain personal data.

We take appropriate steps to retain personal data only for so long as is necessary, taking into account the following criteria:

- the amount, nature, and sensitivity of the personal data;
- the risk of harm from unauthorised use or disclosure;
- the purposes for which we process the personal data and how long we need the particular data to achieve these purposes;
- how long the personal data is likely to remain accurate and up-to-date;
- for how long the personal data might be relevant to possible future legal claims; and
- any applicable legal, accounting, reporting or regulatory requirements that specify how long certain records must be kept.

What we need to do:

All employees need to familiarise themselves with our retention policies, processes, guidelines and instructions that are relevant to their job. Ensure that, where it falls within our responsibility, we destroy or erase all information that we no longer require in accordance with these.

If we are not sure what retention guidelines/instructions apply to us in a particular role, or we are unsure of how to apply them to a particular type or item of personal data, we will consult the Data Protection Champion(s).

7. Take appropriate steps to keep personal data secure

Keeping personal data safe and complying with Fluorocarbon's security procedures to protect the confidentiality, integrity, availability and resilience of personal data is a key responsibility for Fluorocarbon and its workforce.

Fluorocarbon has a Electronic Communications Policy setting out protocols for Employees on use of technology and communications systems, which also help to ensure appropriate security of personal data stored or communicated using such systems.

We regularly evaluate and test the effectiveness of these measures to ensure the security of our personal data processing activities

What we need to do:

To assist Fluorocarbon in maintaining data security and protecting the confidentiality and integrity of the personal data we handle in course of our employment, we require all of our employees to comply with this Policy: Electronic Communications Policy and any Fluorocarbon instructions regarding the processing and security of personal data. In particular, we require our employees to:

Fluorocarbon Group incorporating: Fluorocarbon Limited, Fluorocarbon Surface Technologies Ltd & Fluorocarbon Polymers SRL

Policy name: General Data Protection Policy (GDPR) Data Protection Policy

Date produced: 12 04 2018

Classification: EXTERNAL

- *save, store and communicate personal data only within or using authorised Fluorocarbon information and communications systems. Restrict storage of personal data on personal devices or using personal communications facilities (or BYOD controls)*
- *use password-protected and encrypted software for the transmission and receipt of emails*
- *lock files in a secure cabinet*
- *never leave your laptop, other device or any hard copies of documents containing personal data in a public place*
- *take care when observing personal data in hard copy or on-screen that such information is not viewed by anyone who does not have the right to that information, especially if you are viewing the personal data in a public place*
- *when storing data on portable devices such as laptops, smartphones, or USB drives, ensure that the device is encrypted and password protected*
- *ensure that information containing personal data is disposed of securely and permanently, using confidential waste disposal or shredding where necessary*
- *alert the Data Protection Champion(s) Protection Officer to any personal data breaches immediately.*
- *ensure that any sharing or disclosure of personal data is permitted on appropriate legal grounds and, where necessary, safeguards are in place (see below for further details of safeguards regarding overseas transfers or if sharing personal data with third party service providers)]*

8. Take extra care when sharing or disclosing personal data

The sharing or disclosure of personal data is a type of processing, and therefore all the principles described in this Policy need to be applied.

Internal data sharing

Fluorocarbon ensures that personal data is only shared internally on a 'need to know' basis.

External data sharing

We will only share personal data with other third parties (including group entities) where we have a legitimate purpose, and an appropriate legal ground under data protection law which permits us to do so. Commonly, this could include situations where we are legally obliged to provide the information (e.g. to HMRC for tax purposes) or where necessary to perform our contractual duties to individuals.

We may appoint third party service providers (known as processors) who will handle information on our behalf, for example to provide data storage or other technology services.

Fluorocarbon remains responsible for ensuring that its processors comply with data protection law and this Policy in their handling of personal data. We must assess and apply data protection and information security measures prior to and during the appointment of a processor. The extent of these measures will vary depending on the nature of the activities, but will include appropriate risk assessments and reviews, and contractual obligations.

Details of the recipients or categories of recipients of personal data (including processors and other third parties) should be set out in privacy notices as described in section 1 above.

What we need to do:

We may only share or disclose the personal data we hold internally with an Employee, agent or representative of Fluorocarbon if the recipient has a job-related need to know the information.

We may only disclose the personal data we hold to service providers or other third parties (including group entities) where:

- there is a legitimate purpose and an appropriate legal ground for doing so (e.g. it is necessary for them to process the personal data in order to provide a service to us such as payroll, or if we are legally obliged to do so);
- the individuals whose personal data is being shared have been properly informed (e.g. in an appropriate privacy notice);
- if the disclosure is to a service provider, Fluorocarbon has checked that adequate security and data protection measures are in place to protect the personal data concerned;
- the service provider or third party has signed up to a written contract that contains the provisions required by data protection law (unless the Data Protection Champion(s) has determined that this is not required in context); and
- the transfer complies with any overseas transfer restrictions, if applicable.

Routine disclosures of personal data to established recipients (e.g. payroll providers or group entities) which form a normal and regular part of your role and job duties will ordinarily satisfy the above requirements. We would always ensure we comply with any particular Fluorocarbon instructions we are given. However, if we are in any doubt as to whether we can share personal data with anyone else, we will first consult with the Data Protection Champion(s).

9. Do not transfer personal data to another country unless there are appropriate safeguards in place

An overseas transfer of personal data takes place when the data is transmitted or sent to, viewed, accessed or otherwise processed in, a different country. European Union data protection law restricts, in particular, personal data transfers to countries outside of the European Economic Area (EEA – this is the European Union plus Norway, Liechtenstein and Iceland), to ensure that the level of data protection afforded to individuals is not compromised (as the laws of such countries may not provide the same level of protection for personal data as within the EEA).

To ensure that data protection is not compromised when personal data is transferred to another country, Fluorocarbon assesses the risks of any transfer of personal data outside of the EEA (taking into account the principles in this Policy, as well as the restrictions on transfers outside the EEA) and puts in place additional appropriate safeguards where required.

We currently *transfer personal data to the USA under* The EU-US Privacy Shield which replaces the Safe Harbor framework. It is a binding legal instrument under European law which can be used as a legal basis for transferring personal data to the US

What we need to do:

Fluorocarbon Group incorporating: Fluorocarbon Limited, Fluorocarbon Surface Technologies Ltd & Fluorocarbon Polymers SRL

Policy name: General Data Protection Policy (GDPR) Data Protection Policy

Date produced: 12 04 2018

Classification: EXTERNAL

If we are required to transfer individuals' personal data outside of the UK or EEA in the course of our employment, adequate safeguards will need to be in place. Where these overseas transfers are a normal part of our role and job duties, Fluorocarbon's current safeguards are likely to provide the required levels of data protection.

However, if we are transferring personal data overseas in alternative circumstances (e.g. for new types of processing activities which haven't previously formed part of our job scope and activities, or to countries with which you haven't previously dealt) we would contact the Data Protection Champion(s) for further guidance before going ahead with the transfer.

10. Report any data protection breaches without delay

Fluorocarbon takes any data protection breaches very seriously. These can include lost or mislaid equipment or data, use of inaccurate or excessive data, failure to address an individual's rights, accidental sending of data to the wrong person, unauthorised access to, use of or disclosure of data, deliberate attacks on Fluorocarbon's systems or theft of records, and any equivalent breaches by Fluorocarbon's service providers.

Where there has been a breach of security leading to the accidental or unlawful destruction, loss, alteration, unauthorised disclosure of or access to individuals' personal data, Fluorocarbon will take immediate steps to identify, assess and address it, including containing the risks, remedying the breach, and notifying appropriate parties (see below).

If Fluorocarbon discovers that there has been a personal data security breach that poses a risk to the rights and freedoms of individuals, we will report it to the ICO within 72 hours of discovery.

We also keep an internal record of all personal data breaches regardless of their effect and whether or not we report them to the ICO.

If a personal data breach is likely to result in a high risk to the rights and freedoms of individuals, we will tell affected individuals that there has been a breach and provide them with information about its likely consequences and the mitigation measures we have taken.

What we need to do:

If we become aware of any breach (or suspected breach) of this Policy (including, in particular any security breach), we must report it to the Data Protection Champion(s) immediately to ensure that the breach is effectively assessed and addressed, and that we comply with Fluorocarbon's data breach reporting obligations.

11. Do not use profiling or automated decision-making unless you are authorised to do so

Profiling, or automated decision-making, occurs where an individual's personal data is processed and evaluated by automated means resulting in an important decision being taken in relation to that individual. This poses particular risks for individuals where a decision is based solely on that profiling or other automated processing.

One example of solely automated decision-making would be using an online psychometric test to automatically reject job applicants who do not meet a minimum pass mark (without any human oversight such as a review of the test results by a recruiting manager).

Fluorocarbon Group incorporating: Fluorocarbon Limited, Fluorocarbon Surface Technologies Ltd & Fluorocarbon Polymers SRL

Policy name: General Data Protection Policy (GDPR) Data Protection Policy

Date produced: 12 04 2018

Classification: EXTERNAL

Data protection law prohibits decision-making based solely on profiling or other automated processing, except in very limited circumstances. In addition, where profiling or other automated decision-making *is* permitted, safeguards must be put in place and we must give individuals the opportunity to express their point of view and challenge the decision.

What we need to do:

If we conduct profiling or other automated decision-making in the course of our role, we must familiarise ourselves with and implement any applicable safeguards.

If we are proposing to undertake any new automated decision-making or profiling activities in the course of our employment, we will contact the Data Protection Champion(s), who will advise whether it is permitted and about the safeguards we need to put in place.

12. Integrate data protection into operations

Data protection law requires Fluorocarbon to build data protection considerations and security measures into all of our operations that involve the processing of personal data, particularly at the start of a new project or activity which may impact on the privacy of individuals. This involves taking into account various factors including:

- the risks (and their likelihood and severity) posed by the processing for the rights and freedoms of individuals;
- technological capabilities;
- the cost of implementation; and
- the nature, scope, context and purposes of the processing of personal data.

We also seek to assess data protection risks regularly throughout the lifecycle of any project or activity which involves the use of personal data.

What we need to do:

If we are involved in the design or implementation of a new project or activity that involves processing personal data, we must give due consideration to all the principles of data protection set out in this policy.

We should assist the Data Protection Champion(s) with regular reviews of projects or activities to ensure data protection risks continue to be addressed.

A useful tool for assessing data protection and privacy considerations is a Data Protection Impact Assessment or 'DPIA'. A DPIA will consider the necessity and proportionality of a processing operation, and assess the risks to individuals and the measures that can be put in place to mitigate those risks. A DPIA must be carried out if a data processing operation is likely to give rise to a high risk to individual rights and freedoms.

If we are involved in the design or implementation of a new project that involves processing personal data, we must check whether it is necessary to conduct a DPIA or similar risk or compliance assessment by contacting the Data Protection Champion(s). They will also be able to advise us on how we expect our staff to conduct, or otherwise contribute to, a DPIA or similar risk assessment.

Fluorocarbon Group incorporating: Fluorocarbon Limited, Fluorocarbon Surface Technologies Ltd & Fluorocarbon Polymers SRL

Policy name: General Data Protection Policy (GDPR) Data Protection Policy

Date produced: 12 04 2018

Classification: EXTERNAL

Individual Rights and Requests

Under data protection law, individuals have certain rights when it comes to how we handle their personal data. For example, an individual has the following rights:

- **The right to make a 'subject access request'**. This entitles an individual to receive a copy of the personal data we hold about them, together with information about how and why we process it and other rights which they have (as outlined below). This enables them, for example, to check we are lawfully processing their data and to correct any inaccuracies.
- **The right to request that we correct incomplete or inaccurate** personal data that we hold about them.
- **The right to withdraw any consent** which they have given.
- **The right to request that we delete or remove** personal data that we hold about them where there is no good reason for us continuing to process it. Individuals also have the right to ask us to delete or remove their personal data where they have exercised their right to object to processing (see below).
- **The right to object to our processing** of their personal data for direct marketing purposes, or where we are relying on our legitimate interest (or those of a third party), where we cannot show a compelling reason to continue the processing.
- **The right to request that we restrict our processing** of their personal data. This enables individuals to ask us to suspend the processing of personal data about them, for example if they want us to establish its accuracy or the reason for processing it.
- **The right to request that we transfer** to them or another party, in a structured format, their personal data which they have provided to us (also known as the right to 'data portability'). The applicability of this right depends on the legal grounds on which we process it.
- **The right to challenge a decision** based solely on profiling/automated processing, to obtain human intervention, and to express their point of view.

We are required to comply with these rights without undue delay and, in respect of certain rights, within a one month timeframe.

Individuals also have rights to complain to the ICO about, and to take action in court to enforce their rights and seek compensation for damage suffered from, any breaches.

What we need to do:

If we receive a request from an individual seeking to exercise a right in relation to their personal data, or making an enquiry or complaint about our use of their personal data, we must forward the request, enquiry or complaint to the Data Protection Champion(s) immediately so that it can be dealt with appropriately and within the applicable time limit.

Record Keeping

In order to comply, and demonstrate our compliance, with data protection law, Fluorocarbon keeps various records of our data processing activities. These include a Record of Processing which must contain, as a minimum: the purposes of processing; categories of data subjects and personal data; categories of recipients of disclosures of data; information

Fluorocarbon Group incorporating: Fluorocarbon Limited, Fluorocarbon Surface Technologies Ltd & Fluorocarbon Polymers SRL

Policy name: General Data Protection Policy (GDPR) Data Protection Policy

Date produced: 12 04 2018

Classification: EXTERNAL

about international data transfers; envisaged retention periods; general descriptions of security measures applied; and certain additional details for special category data.

What we need to do:

We must also comply with our applicable processes/guidelines and any specific instructions you are given concerning the keeping of records about our processing of personal data.

If we are processing individuals' personal data in the course of our employment and we collect any new types of personal data or undertake any new types of processing activities, either through the introduction of new systems or technology or by amending existing ones, we will inform the Data Protection Champion(s) so that we are able to keep our records up-to-date.

Training

We require all Employees to undergo some basic training to enable them to comply with data protection law and this policy. Additional training may be required for specific roles and activities involving the use of personal data.

To this end, we provide training as part of our induction process for new joiners to Fluorocarbon and operate an ongoing training programme to make sure that Employees' knowledge and understanding of what is necessary for compliance in the context of their role is up-to-date. Attendance at such training is mandatory and will be recorded.

Departures from this Policy

There are some very limited exemptions from data protection law, which may permit departure from aspects of this Policy in certain circumstances.

Our staff will be given specific instructions if any exemptions are relevant to their role.

If we think we should be able to depart from this Policy in any circumstances, we must consult the Data Protection Champion(s) before taking any action.
